Enrolment, once per person
Camera
one face in view
Detect and align
dlib, 68 landmarks,
400 px wide
Save photos
every 5th frame:
8 train, 2 test
Train
128-number face code,
k-NN classifier
trained model
Recognition, live
Camera frame
halved; every
30th frame used
Find and encode
each face
in the frame
Nearest match
distance ≤ 0.5,
else “unknown”
Greet once
after 10 frames with
the name: hello, handshake
